

# Cooled ventilation in a workshop

SWB Group

One of the goals of SWB, a workplace for physically challenged people in Hengelo, The Netherlands was to improve the working climate in the eight, 10,000 square foot workshops. An important additional desire was to maintain a comfortable climate all year long. The SWB found their solution with the StatiqCooler. The choice was made to implement a StatiqCooler system in combination with heat recovery.

**SWB in Hengelo fulfilled the wishes of the management and personnel by installing StatiqCooler and achieved:**

- Optimal ventilation within the entire building
- A pleasant climate inside to work in on warm and cold days
- Savings of costs for heating and cooling

*“SWB Hengelo had to replace the existing climatization system in all the workshops. This was quite a large investment for our organization! We looked for a system which took into consideration our carbon footprint.*

*The system from StatiqCooling which both ventilates and cools is ideal for this purpose, especially in combination with heat recovery in winter. Besides we will recover the costs in 6 years, due to energy cost savings”.*

*Mr. Boerjan, Manager industry, SWB Hengelo, The Netherlands*
